FILLER SET

Filler System which complements the beauty of the bathtub and allows you to easily fill water Filler system

- 1) Cascade Waterfall Filler for filling up of bathtub
- 2) Multi Flow Hand Shower
- 3) Diverter System for controlling the flow of water between Filler and Hand Shower
- 4) Mixer for controlling the quantity of input of hot water and cold water.

WHIRLPOOL MASSAGE

Jacuzzi or whirlpool is massage system for bathtub. There are six jets, 3 on either side of the bathtub which massage your body from the side.

Our Jacuzzi motors are 1.5 H, TUV certified.

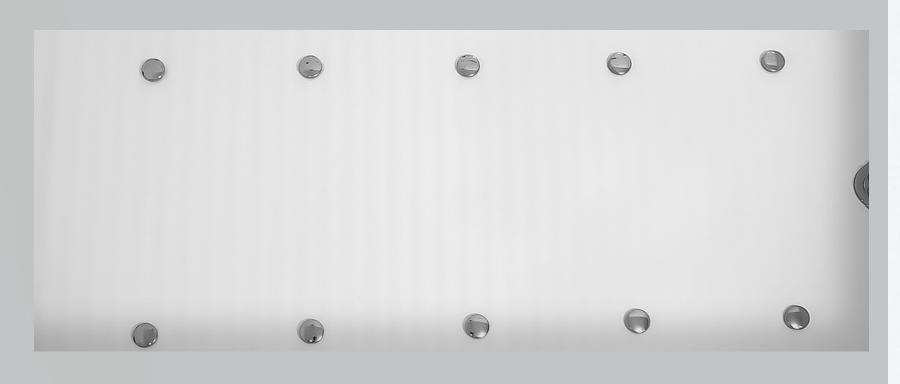

All 6 nozzles are centrifugal massage jets, which means that it is a rotatory mixture of water and air that hits and relaxes your body. It is not simply a pressurized jet of water. It is a true whirlpool system.

BACK AND FOOT MASSAGE

Back massager is another great add on with the Jacuzzi as it has 6 separate nozzles along with centrifugal jets,2 nozzles towards your feet and remaining 4 towards the back, so you would be getting your feet massaged along with your back, in short it would be a complete body massager for you.

It is powered by the same Jacuzzi motor.

BUBBLE BATH

Bubble bath is another massage system. In bubble bath system 10 nozzles would be at the base of the bathtub which would massage your body from the bottom.

We have a separate 1HP motor for bubble bath.

Our bubble bath motors are also TUV certified, which is again German quality certification.

DIGITAL PANEL

Feather Touch Digital Control System you can control the temperature of water, not only turn on/off the Jacuzzi as well as have complete access to control the pressure of its jets.

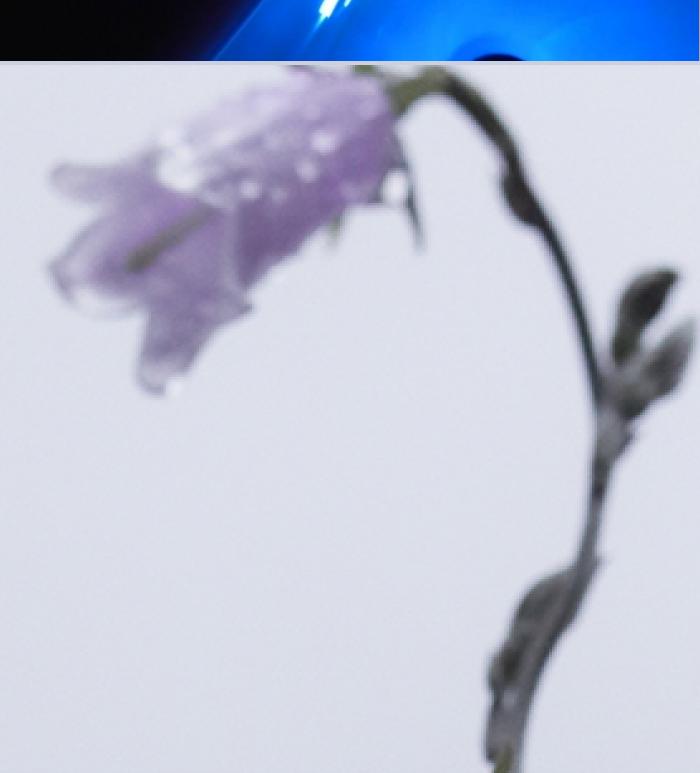

3 Kilo watt water heater equipped in Jacuzzi

The purpose of the water heater is to maintain the temperature of the water in the bathtub. It won't let the temperature to cool down.

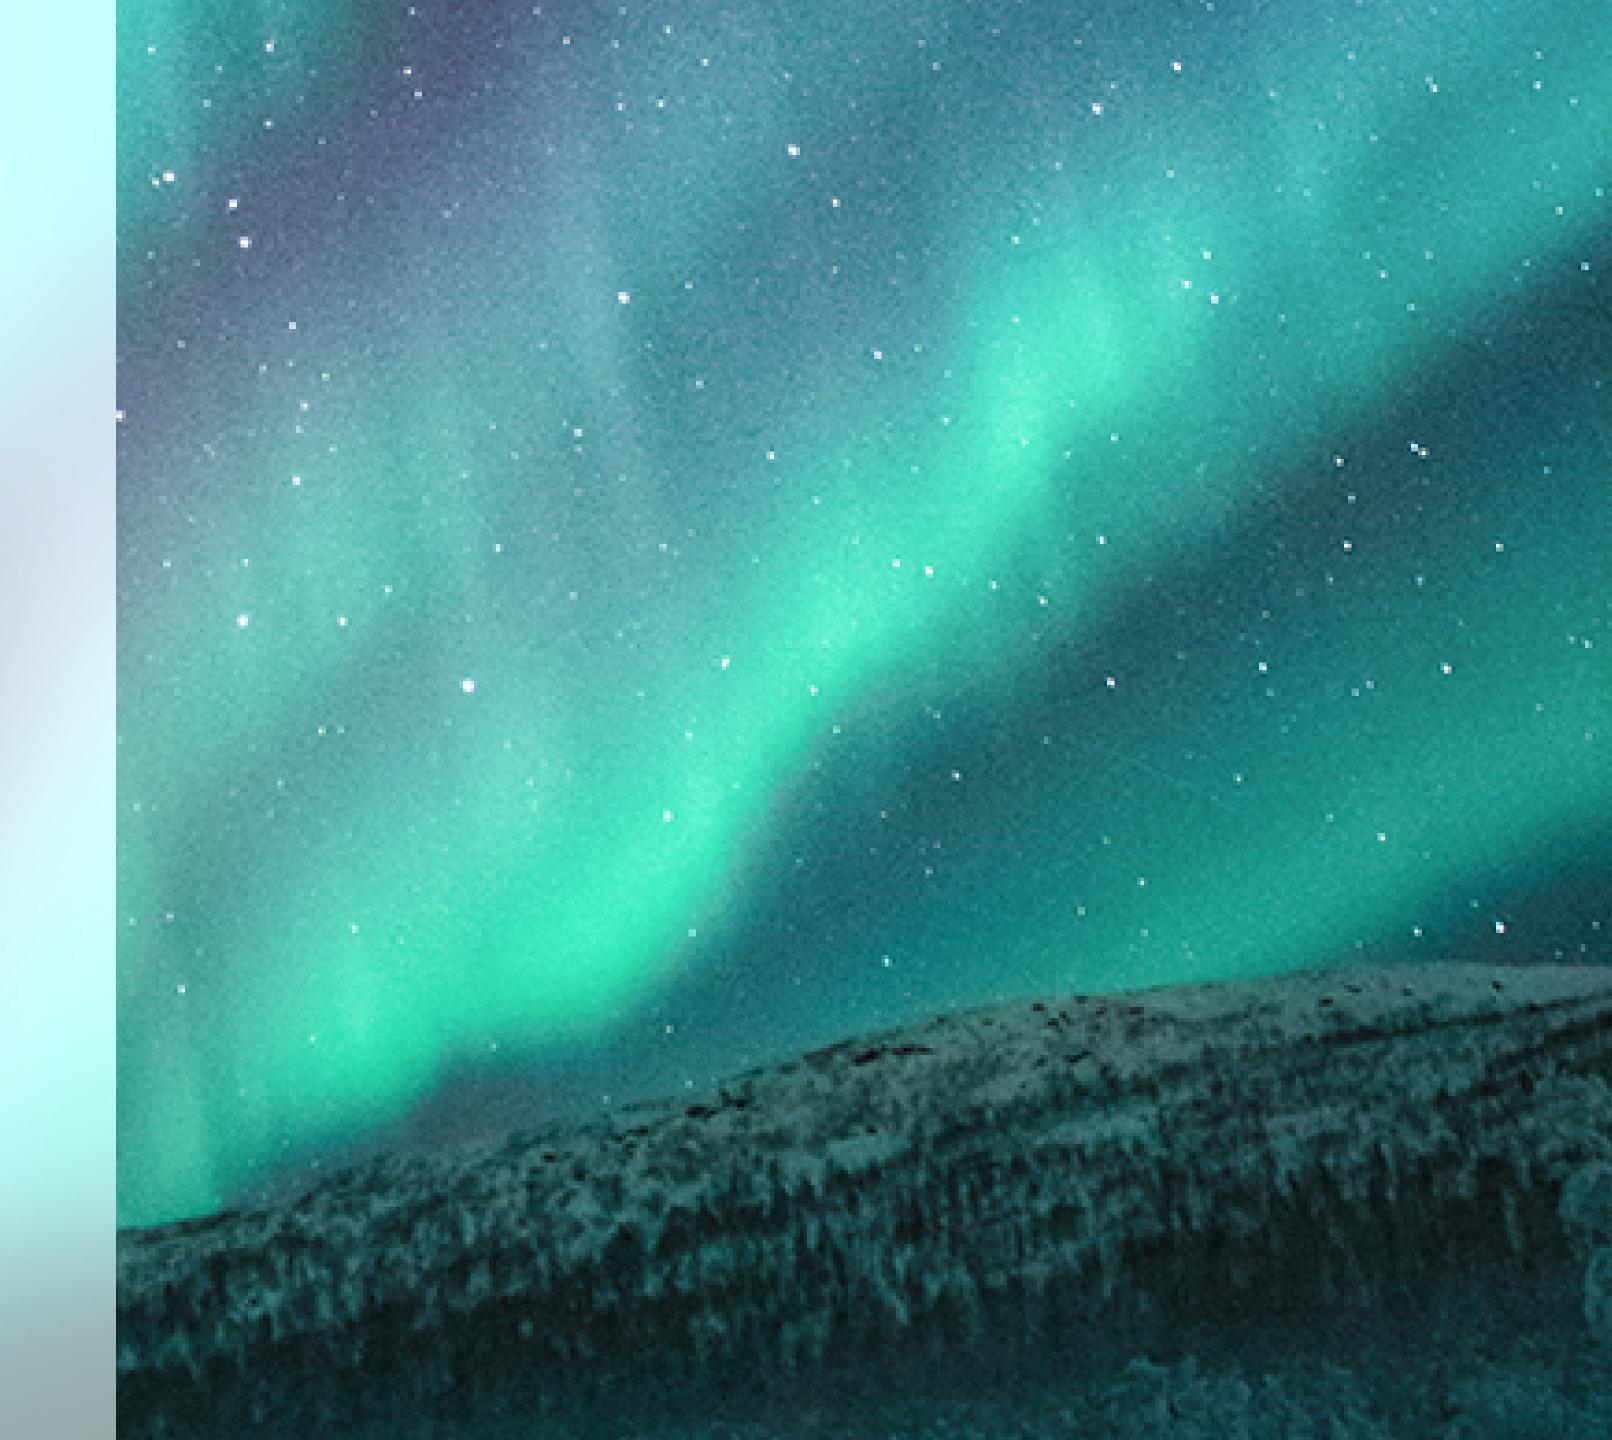

CHROMOTHERAPY

In lighting, we have three distinct options:

- •The first option is for a single LED underwater light which lights up your bathtub
- •Second, we can plan for each of the 6 Jacuzzi Nozzles to have LED Mood lighting. You can set up the color as per your mood
- •Third, we can also plan for each of the 10 Nozzles in the Bubble Bath to have LED Mood Lighting. Again, we have the option to set up the color as per your choice Both Jacuzzi and Bubble lighting really brighten up the bathtub and provide it an amazing ambience, especially at night. We can plan for any one or more of these lighting options.
